

TC9376H Tamperproof Ceiling Housing

- Replaces Ceiling Panel
- Flame Retardant
Textured Plastic
- Rotates and Locks
in Any Position
- Low Profile Design
- Scratch Resistant
Window
- Camera Brackets
Included

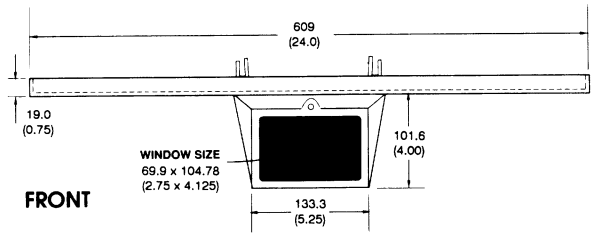

This housing is designed for a fixed solid state or small 2/3-inch camera and lens. The unit is low in profile and fits into a 2 foot x 2 foot drop ceiling. This housing is capable of 360 degree viewing, which is achieved through a

unique inner part. You simply decide which direction you wish the camera to point, rotate the housing around to that angle and lock into place. It is equipped with an adjustable camera bracket and scratch resistant window.

All material is thermoformed from high impact 0.187-inch thick hair cell textured plastic. The material is off-white in color and has a 94 VO flame retardant rating.

Dimensions in millimeters. Dimensions in parentheses are in inches.
 Maximum Camera Length: 279 mm (11.0 in); includes fully extended lens and rear cable connectors.
