

Description

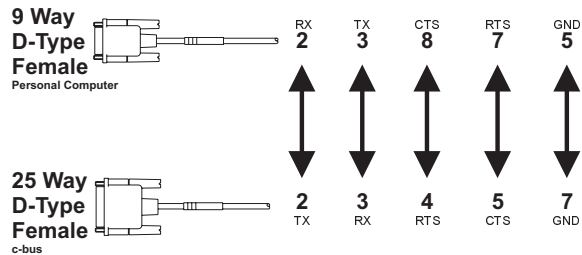

The Uniplex Series 1 and Series 2 range of multiplexers can be fully controlled by a personal computer.

The personal computer is connected through the Dedicated Micros c-bus PC adapter. This provides forward compatibility through the PC serial port onto the c-bus network.

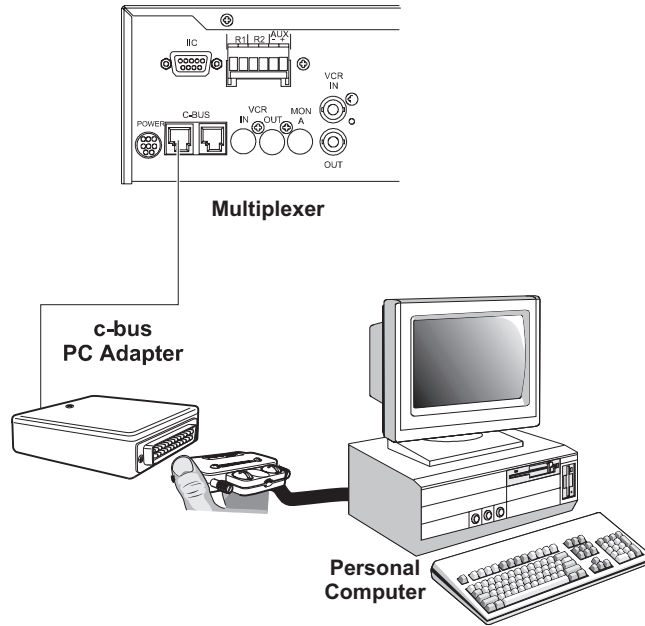

The diagram below shows basic connectivity.

Cabling Requirements

As shown in the connectivity diagram, the personal computer or laptop connects to the c-bus PC adapter via a 25 way D-type to 9 way D-type connector, the diagram below illustrates the pin connection for the manufacture of this cable.

Connectivity Diagram

For more details on this product, please refer to the relevant multiplexer manual.
