

# High Speed Domes

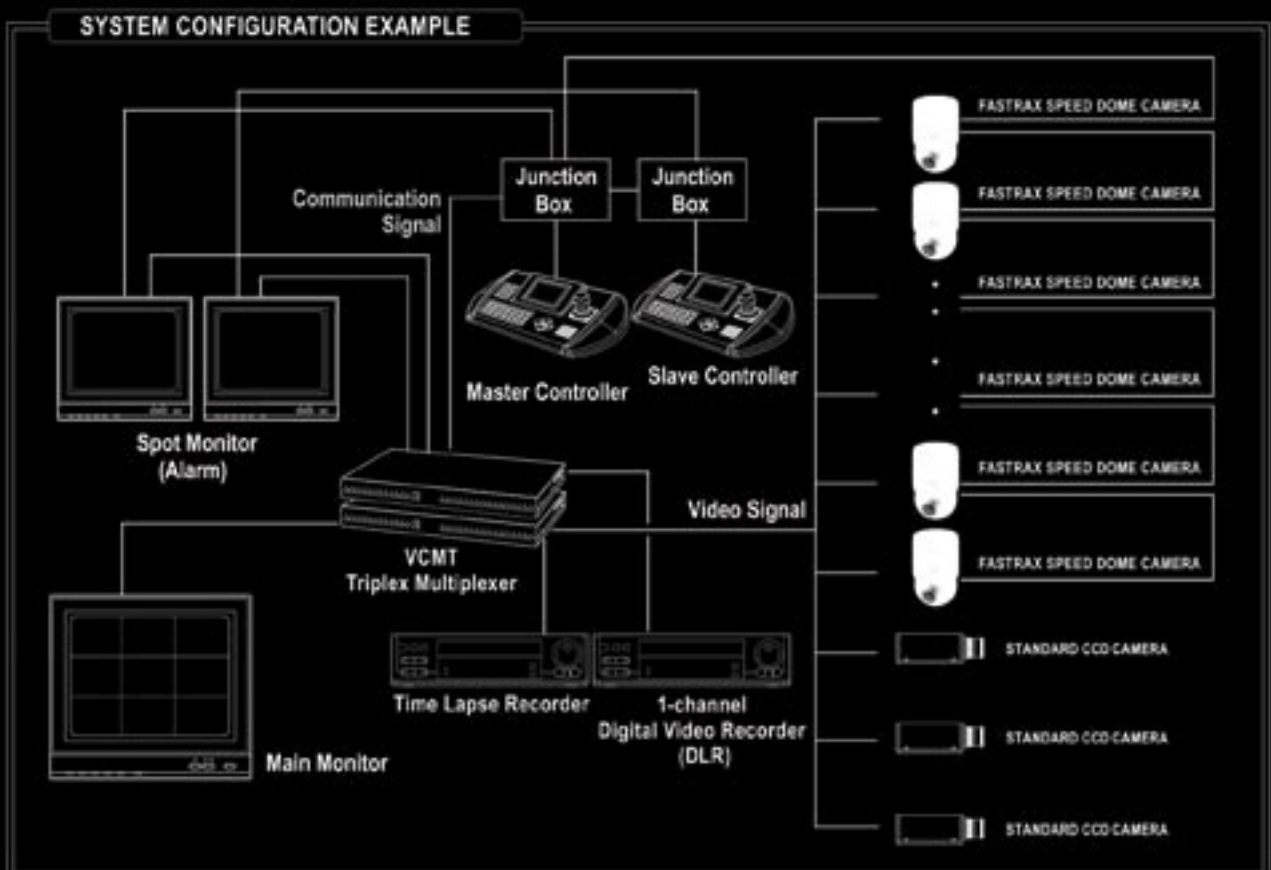

The Fastrax Dome  
Series from eneo:  
High-tech with  
High Savings

# Vigilant by Day and Night.

The Fastrax Domes are the new stars in the eneo product programme. The inspirational features of the compact hi-tech camera systems are unusual at this price category. First and foremost, the well-engineered day/night switchover is outstanding. A total of three modes can be selected for this function. This is assisted, for instance, by an infrared cut filter that eliminates the disruptive infrared daylight portion to deliver optimised images in all lighting conditions. And the camera resolution of 460 TV Lines detects all important details. Speed is one of your priorities? No problem. The High Speed Domes travel to positions at up to 380°/sec. Up to 240 fixed positions can be stored. The list of other features is also impressive: it includes eight alarm inputs and four outputs as well as eight programmable guard tours. Fully in trend is securing of the private sphere with up to four so-called Privacy Zones. These are sections on the video image that are dynamically blanked according to the selected focal length: a road can be monitored, but not the window in the flat above. Dome Camera control is achieved by a control keyboard with a joystick and integral 4" TFT monitor, or by other eneo series equipment, such as a multiplexer, matrix switcher or digital recorder. You want to operate only one device? Then control the whole domes, multiplexer and digital recorder system from the control keyboard. A favourably-priced solution for small and medium-sized systems. So versatile can also be good value.

# eneo Fastrax Dome Camera Series at a glance

	<b>EDC-OPC</b> <b>Pendant Mount Outdoor Dome Housing, Clear Bubble 6.8"</b> <b>Art.-Nr.: 74056</b>
Outdoor Housing for Fastrax-Dome Camera Series	
For Wall and Ceiling Mount	
Sunshield, Heater and Blower Kit included	
Clear Bubble 6,8" (17,2cm)	
Protection Rate: IP65	
Connection 1 1/4" PT thread	
Aluminium Housing, Pipes: Steel, Trimring: Plastic	
Weight approx. 4,3kg	
Supply Voltage 24VAC, 50/60Hz	
Load Capacity approx. 2,0kg

RS-485/RS-422 Interface	
8 Alarm Inputs/4 Outputs	
Programmable Alarm Action with Priority Levels	
Quick Detachable (Hot Swap)	

\* Values in brackets refer to the model **EDC-161** (1/6" Camera with 25x Zoom)

## Extensive Accessories - Easy Installation

The eneo Fastrax displays some of its other strengths during installation. If a housing is not required, the compact dome cameras can easily be mounted directly on the ceiling with the supplied mount. This saves time and also installation costs. Mounts for both wall and ceiling installation are included in the set for different housings. This provides the necessary on-site flexibility and makes planning easier. And control and operation of the Fastrax domes is unsurpassed pleasure in a system made up of other eneo products, such as a DLR digital recorder or multiplexer.
