INTEGRATED DATA MANAGER ENTERPRISE EDITION

Honeywell's Integrated Data Manager Enterprise Edition (IDM EE) is a next generation data monitoring plus data mining solution that allows complete integration of transaction data with video from Honeywell digital recorders and network digital recorders. Built around the Microsoft® .Net technology, IDM EE is a true enterprise solution for large sized applications that require video and data analysis of hundreds of point-of-sale terminals and camera systems across multiple locations via LAN/WAN or DSL.

Real-time reporting enables IDM EE to generate fixed reports, customize searches and daily summaries, and create exception reports to pinpoint suspect activity in seconds. Fixed reports allow transaction data to be quickly filtered by specific search criteria. The powerful search feature generates customized reports using criteria such as operator, terminal, description, action code, modifier/amount, time, search type, and exceptions. Daily summaries and exceptions may be e-mailed to specified personnel, so that businesses can make timely decisions. IDM EE automatically highlights exceptions that may be bookmarked for future analysis. Reports can be produced and exported in HTML format for ultimate flexibility.

Market Opportunities

IDM EE is a cost-effective solution for reducing internal shrinkage due to employee theft, increasing employee productivity, and enhancing customer service. Transaction data from cash registers, ATMs, slot machines, weighing bridges, cash counters, online systems, and other data sources can be conveniently monitored and stored for data mining, making IDM EE an ideal solution for a wide variety of retail, food and beverage, financial, gaming, and other applications that require monitoring of multiple server sites.

Features

- Seamless integration between POS data and surveillance video across multiple server sites
- Single enterprise application
- Remote access via LAN/WAN or DSL
- Software solution eliminates installation costs associated with POS monitoring hardware
- Easy-to-use interface for setup and management
- Automatic summaries and exception reports generated and e-mailed to select personnel
- Universal interface – locally or remotely
- Support for InfoGenesis and Micros® 8700/9700 POS
- Compatibility with Honeywell DVRs and NVRs: Enterprise, Fusion and Rapid Eye™ (as DVR only)
- Video player allows local and remote creation of video clips with audio
- Real-time transaction reporting
- Backward compatibility with Honeywell and TVS point-of-sale hardware

SPECIFICATIONS

| System Requirements | |
|----------------------|---|
| Operating System | Windows 2000, Windows XP |
| Computer/Processor | 1.2 GHz or higher Pentium IV-compatible CPU |
| Memory | 512 MB minimum of available RAM More memory generally improves responsiveness |
| Hard Disk | 80 GB or higher |
| Connection | 10/100 Ethernet LAN |
| System Configuration | |
| Data Storage | Local server to capture and store transaction data; PC, Fusion or Enterprise server |
| Remote Access | LAN/WAN or DSL |
| Server Connectivity | Multiple server sites may be connected and configured from one central database |

| LAN/WAN or DSL | |
|-------------------------|--|
| Digital Video Recorders | Enterprise, Fusion and Rapid Eye (as a DVR only) |
| Software | InfoGenesis and Micros 8700/9700 |
| Hardware | Compatible with Honeywell and TVS POS hardware |
| Searchable Fields | |
| Searches | Server, operator, terminal, text description, action code, modifier/amount, time interval, search type and exception |
| Exceptions | Type (text/action code), condition and amount |
| Text | |
| Display | Side-by-side with video or overlaid using text insertion hardware |

System Diagram

| Ordering | |
|--------------|--|
| HESRVRE2-IDM | HESRVRE2 server with IDM EE Basic Software factory installed and license to support up to 4 POS terminals at a server site. Order HAIDMETADDSW for additional terminal licenses. |
| HAIDMEFPKG | Factory installed IDM EE software on Fusion DVR to support up to 4 POS terminals at a server site. |
| HAIDMETADDSW | IDM EE Software License for each additional POS terminal when IDM EE is factory installed on Honeywell DVR/NVR. Requires IDM EE Basic Software License Package |
| HAIDMEPKNI | IDM EE Basic Software License Package when IDM is installed in the field. Supports 1 server site and 4 POS terminals |
| HAIDMETADDNI | IDM EE Software License for each additional POS terminal. Requires HAIDMEPKNI |
| HAIDME1YSP | IDM EE Software Support for 1 Year, per POS terminal |
| HAIDMCD | CD with 60-day Trial IDM Software. Supports 1 server site, 8 POS terminals, and 2 remote clients |
