

HEG14

GRAND ENVIRONMENTAL HOUSING

The HEG14 series are stylish and functionally designed camera enclosures with features such as snap-on sunshield and adjustable mounting track that allows for easy installation.

To insure proper camera/lens adjustment, the camera remains stationary when opening the housing for camera service.

They are constructed of die-cast and extruded aluminum with an epoxy powder-coating making them corrosion resistant. Weatherproofing and dustproofing are accomplished with durable neoprene end gaskets making the housings suitable for all indoor and outdoor applications.

These housings can accommodate 2/3", 1/2" and 1/3" CCD cameras with fixed focal length or large zoom lenses.
