

SCR 506/SCR506R D/N overview & close-range plate capture camera

The SCR506/SCR506R combines a high-performance plate-capture camera with Day/Night overview functionality to monitor surrounding areas, providing information on vehicle type, color, and shape. When integrated with the external License Plate Recognition (LPR) software, the SCR506 can also capture non-reflective and the SCR506R can capture reflective plates at short range. These two cameras can play a dual role, capturing license-plates and monitoring surrounding areas.

The camera's outstanding feature set ensures seamless integration and enhanced performance when used in conjunction with external LPR software. The SCR506/SCR506R is equipped with powerful 850 nm IR to ensure that it works perfectly even in total darkness to deliver clear plate images. Its varifocal IR-corrected lens and IR day/night mode keep it in focus day and night to optimize its round-the-clock image-capture capabilities. In short, the SCR506/SCR506R provides the kind of reliability and day-and-night surveillance-and-capture performance crucial to maximizing the efficiency of LPR applications.

Day/Night Overview Functionality

Day/Night overview functionality enables this plate capture camera to monitor surrounding areas, gathering information on vehicle type, color and shape.

24-hour Surveillance

The SCR506 incorporates an ICR day/night mode enabling the camera to adapt to diverse lighting conditions.

Powerful IR

Its powerful IR functionality and integrated IR-corrected lens deliver perfect image captures and outstanding images. It is also equipped with a high-power LED to help minimize energy usage.

Wide Range Capture

Its built-in 9-22mm lens captures a wide 3-8 m(10-27 ft) field.

Rain Guard/ Extendable Sunshield

The camera's rain guard and extendable sunshield minimize the effects of rain and sunlight on image quality.

Easy Installation

The cable-management bracket enables easy installation in any location, including walls, surfaces, and ceilings.
