XProtect® Essential NVR

Protecting your investment has never been easier

The XProtect Essential NVR is a ready-to-use Hewlett Packard (HP) Workstation pre-loaded with XProtect Essential IP video management software (VMS) that manages up to eight or 16 surveillance cameras. With software preinstalled and complex IT calculations already taken into consideration, XProtect Essential NVR makes setting up your security system simple, so you can focus on safeguarding assets. XProtect Essential NVR is not only effortless to set up, it is also incredibly easy to use with a wide array of features to effectively and intuitively manage your system.

With the XProtect Essential NVR you also have the unique opportunity to take advantage of the expertise of two industry leaders, Milestone and HP, both providing a high level of support and reliability. With all Milestone products, the open platform provides unlimited choice of cameras to ease the transition from analog to IP cameras.

Milestone is your foundation for long-term success

Milestone is the world's leading provider of open platform IP video surveillance software. Milestone's XProtect software integrates with more cameras than any other manufacturer, giving you the freedom to choose equipment according to your needs and budget. Because Milestone provides an open platform, it is easy and cost-effective to scale your installation and add best-of-breed innovations to your solution.

Committed to providing a true IP video open platform and freedom of choice, Milestone is proud to be among the first VMS vendors to support ONVIF and PSIA standards.

XProtect Essential NVR is:

- **Effortless:** Setup is fast and easy with preinstalled software and configured hardware for optimal performance.
- **Cost-effective:** Experience the benefits of IP with unlimited choice in cameras based on your budget and needs.
- **Reliable:** On-site professional hardware service gives you peace of mind.

The Open Platform Company

Preconfigured software bundle eases setup

XProtect Essential NVR is a unique IP VMS bundle that features an HP Workstation preloaded with the market leading XProtect Essential, offering you all of the benefits of Milestone's advanced surveillance software. Designed for small businesses, XProtect Essential NVR arrives preloaded with all of the software, storage and technical IT configurations you need, making setup faster and simpler than ever, which saves you time and money.

Included in the preinstalled XProtect Essential NVR are unique configuration wizards that swiftly guide you through the process of configuring video, scheduling recordings and managing system users. XProtect Essential NVR also features an automated camera discovery setup assistant which quickly scans the network for cameras and helps you add them to your video system, cutting your setup time.

The components of XProtect Essential NVR:

- Hewlett Packard Z200 Workstation
- Intel® Core™ i3 processors
- Either 1 or 2 TB of storage
- Preinstalled XProtect Essential for eight or 16 cameras
- Preinstalled Microsoft Windows 7 Professional 64-bit
- Mouse and keyboard
- 3-year hardware warranty
- 3-year on-site hardware support
- Software support from Milestone

**Monitor not included*

The key features of XProtect Essential NVR:

- A ready-to-use Workstation computer preinstalled with Microsoft® Windows 7 Professional operating system and all the necessary software for running the intelligent surveillance system XProtect Essential NVR.
- XProtect Management Application, which helps you configure the surveillance system and is pre-installed on the Workstation at delivery.
- XProtect® Smart Client, which is used to view live and recorded video and supports network or analog cameras, is preinstalled on the Workstation prior to delivery. XProtect Smart Client can also be easily installed on any other computer so you can instantly view video from anywhere in the world.

Secure your future as you transition from analog to IP

As surveillance camera technology steadily shifts from analog to IP based, XProtect Essential NVR allows you to transition to newer technology with ease. XProtect Essential NVR is equipped to manage analog and IP cameras, which gives you the possibility to blend camera technologies so you do not need to immediately invest in additional hardware. The technical specifications for using IP cameras are preconfigured on XProtect Essential NVR so you can gradually and comfortably incorporate IP network cameras into your security installation.

With the industry's widest selection of supported cameras – over 1,000 models from more than 80 manufacturers – XProtect Essential NVR allows you to mix different camera brands to maximize and specialize your security solution for your specific needs and budget. As your business grows and changes, XProtect Essential NVR grows and changes with you. It is easy to add or replace cameras individually and take advantage of new innovations as they come to the market.

Powerful applications made simple

XProtect Essential NVR also features Milestone's XProtect Smart Client, an advanced, yet easy-to-use client application that provides you with flexible camera views and instant access to watch and control live cameras or recorded video. XProtect Smart Client has powerful features that make it easy to manage your video: Timeline Browser, Sequence Explorer and Quick Export.

Timeline Browser

With the Timeline Browser you can instantly find video recordings from one or more cameras in chosen time periods by browsing adjustable time spans, allowing you to quickly locate incidents.

Sequence Explorer

The Sequence Explorer gives you an unparalleled visual overview of recorded video and bookmarked incidents in thumbnail previews, which speeds up your investigation work and simplifies evidence export.

Quick Export

Quick Export gives you the ability to seamlessly export a video recording sequence in JPEG format or AVI format. As an AVI movie file, your video evidence export includes video and audio.

Tested and supported high-performance solution

XProtect Essential NVR is shipped with a three-year hardware warranty and a three-year exclusive hardware support agreement. Rest assured the XProtect Essential NVR has undergone rigorous testing, and three years of on-site hardware support

is provided to give you peace of mind that your investment is secure. The HP Workstation also has the latest Intel® technology, optimizing the performance of the system and ensuring secure storage of your video recordings.

To provide more flexibility and greater value, you can efficiently transition to IP by blending digital security technologies with analog cameras already on hand.

XProtect Essential NVR

The Open Platform: a foundation for long-term success

Milestone XProtect acts as the powerful core of surveillance systems, providing the widest choice in third-party hardware components and integration with other business systems. It is the foundation enabling you to cost-effectively choose the best solutions for today and tomorrow.

About Milestone Systems

Founded in 1998, Milestone Systems is the global industry leader in open platform IP video management software. The XProtect platform delivers powerful surveillance that is easy to manage, reliable and proven in thousands of customer installations around the world. With support for the widest choice in network hardware and integration with other systems, XProtect provides best-of-breed solutions to 'video enable' organizations – managing risks, protecting people and assets, optimizing processes and reducing costs. Milestone software is sold through authorized and certified partners. For more information, visit: www.milestonesys.com
