■ 254
Stainless steel camera housing

- It's really hard to find a camera housing which can both protect from aggressive environment and suit very big lenses and cameras. In this case, 254 series is the best choice. The outer body diameter measures 10 inches (254mm) and can be 600 or 700 mm long. This is the biggest size available on the market and it's the only stainless steel housing solution for biggest zoom lenses, such as Raymax "cats 2000", Myutron PH33X16HS-RGE, Fujinon C22 and D60 series, Pentax H20ZAME and H55ZAME series, Kowa LMZ1000AM and its high quality is unique, like its 200 mm usable front window diameter.

The housing is entirely made in AISI316L stainless steel, therefore it guarantee absolute reliability and protection in every environmental condition, even the worst. The stainless steel bracket is conceived to reduce vibrations and to keep the housing still in most windy places and for those special applications that require the absence of any vibrations. Install and maintenance tasks are really easy and the price is affordable.
